

Tuffass Sugar King 200

Super heavy duty mill mud spreader designed by us for the sugar industry. Delivers to 2 or 3 rows at once with adjustable delivery width from 300mm to 2m on each side.

FEATURES:

- Tandem wheels
- Leaf spring suspension
- 36-tonne capacity
- 4-wheel braking
- Rear steering axle
- Heaviest duty 16mm marine floor chains
- Heavy duty twin gearbox

OPTIONS AVAILABLE:

- Rear opening door
- Self contained hydraulic system
- Weight cells for calibrated rate of delivery

The twin delivery belts can deliver to one side, both sides, or centre drop onto three beds. With adjustable widths, they can be adjusted to deliver from 300mm to 2m on either side.

Retracting the belts brings the machine back to 2.5m width to be legal for road use. With a separate control valve, the lateral belts can also be configured to deliver different speeds.

All hydraulics are run from the tractor, but machines can be supplied with an optional self-contained hydraulic system.
