

Tuffass Sugar King 300

The Sugar King 300 is a super heavy-duty spreader ideal for spreading mill run (mill mud), mill ash, plus manure or compost in 2 or 3 rows at once. Designed by us specifically for the Australian sugar industry.

FEATURES:

- Three axles
- Heavy duty leaf suspension
- 48-tonne capacity
- Wheel braking
- Front and rear steering axles
- Heaviest duty 20mm marine type twin floor chains
- Heavy duty twin gearbox
- Walking beam suspension

The twin delivery belts can deliver to one side, both sides, or centre drop onto three beds.

The belts can be adjusted to deliver from 300mm to 2m on either side, and retracting the belts brings the machine back to 2.5m width for legal road use.

With a separate control valve, the lateral belts can also be configured to deliver different speeds. All hydraulics are run from the tractor, but machines can be supplied with an optional self-contained hydraulic system.

OPTIONS AVAILABLE:

- Rear opening door
- Self contained hydraulic system
- Weight cells for calibrated rate of delivery
